Design Process

From ideas ... to real world solutions

New product development has been a defining element throughout our history.

The nature of our products is such that they must be designed to resist the numerous challenges faced within the urban landscape.

We continuously enhance our product range and pave the way in the market by introducing unique products.

Working together with our innovative design team, we want to provide real world solutions, tailored to meeting your needs.

Free Standing Polymer Litter Bins

We have a massive selection of free-standing polymer litter bins in a vast array of colours, and with capacities ranging from 60 litres up to 360 litres you will be sure to find the correct one for your purpose.

All our polymer litter bins will not chip or rust, are easy to clean and never need painting, giving you an attractive and highly functional waste container for many years.

■ Glasdon Jubilee™ 240 Litter Bin

DESIGN FEATURES

- Houses a standard 240 litre wheeled bin or 300 litre sack (with sack retention).
- Inner wheeled bin can be mechanically lifted to reduce manual handling.
- Recessed lifting handle for safer opening with slam shut action.
- Domed hood.
- Four apertures.
- Anti-flyposting finish.
- Concealed knuckle hinge.
- Decorative banding, litter legend and Bin-it™ symbol in Gold or Silver.

OPTIONAL EXTRAS

- Choice of universal ashtray kit and stubber plates (Gold or Gun Metal Grey).
- Glasdon FireSafe™ automatic suppression device.
- A3 poster frame kit.
- A4 personalisation (supplied as a vinyl sticker).
- Aperture flap kit.
- Aperture blanking panels.
- Choice of ground fixing options.

MATERIAL

Bin body & door: Durapol™ material

SPECIFICATIONS

Wheeled bin capacity: 240 litres
Sack retention capacity: 300 litres
Height: 1510mm
Width: 843mm
Depth: 866mm
Weight: housing: 40kg
Wheeled bin: 12.7kg
Sack retention support: 3.5kg

COLOUR

Black.

Glasdon Jubilee™ 110 Litter Bin

DESIGN FEATURES

- Domed textured stubber plate in Gold or Gun Metal Grey.
- Domed hood.
- Four apertures.

Industrial Bin Screen Systems

For large capacity wheeled bin screening solutions, Glasdon have a choice of either a configuration of screens to suit your needs or a hooded screen system to contain up to 1280 litre capacity wheeled bins.

Modus™ Housing

DESIGN FEATURES

- Choice of Modus 770 which can house a 600 litre, 660 litre or 770 litre wheeled bin or Modus 1280 which can house a 1100 litre or 1280 litre wheeled bin.
- Vandalex™ material frame.
- Extremely robust panelling.
- Durapol™ material hood encloses the wheeled bin inside the unit, offers weather protection and provides security.
- Features a 3-point locking system.
- The door features a handle and stainless steel hinge.
- Supplied fully assembled.
- Bolts for permanent ground fixing into concrete.

OPTIONAL EXTRAS

- Choice of fixing options.
- Personalisation.
- Glasdon FireSafe™ automatic suppression device.

MATERIALS

Hood: Durapol material
 Frame: Vandalex material
 Panelling: Ecoboard™ material (contains recycled post consumer plastic)

SPECIFICATIONS

Modus 770 Model
 Capacity: 600, 660 or 770 litre wheeled bin
 Height: 1660mm Width: 1614mm
 Depth: 923mm
 Modus 1280 Model
 Capacity: 1100 or 1280 litre wheeled bin
 Height: 1660mm Width: 1614mm
 Depth: 1257mm

COLOURS

Frame: Silver.
 Hood: Anthracite Grey.
 Aperture: Black.
 Panelling: Dark Grey.

Recycling variants are available.
 Please contact our Sales Office for details.

Visage™ Screen System

DESIGN FEATURES

- Choice of two sided, three sided and four sided screens.
- Units can screen 600 litre, 660 litre, 770 litre, 1100 litre or 1280 litre wheeled bins.
- Low panels provide easy access to open the lid of the wheeled bin behind the screen.
- Vandalex™ material frame.
- Extremely robust panelling.
- Bolts for permanent ground fixing into concrete.

Four sided screen:-

- Front opening door with door stay feature.
- Features a 3-point locking system.
- The door features a handle and stainless steel hinge.
- Adjustable door wheel.

OPTIONAL EXTRAS

- Polycarbonate graphics kit.
- Base skirting.
- Wing lock (four sided screen only).
- Joining Vandalex material extrusion (for alternative screen layouts).
- Personalisation.
- Choice of ground fixing options.

MATERIALS

Frame: Vandalex material
 Panelling: Ecoboard™ material (contains recycled post consumer plastic)

Personalisation, Optional Extras & Fixing Options Guide

Add a unique touch to your Glasdon order with our Personalisation and Branding Service. From adding your organisation's logo or crest, right through to full graphic wraparounds, we have the in-house expertise to help you achieve the impact you require.

Glasdon High Performance Materials

Glasdon products are manufactured from high performance materials and undergo stringent quality checks to ensure durability and best value. We have accreditation with ISO 9001:2015, underlining our commitment to provide quality products.

Throughout this brochure reference is made to the following materials:

Armortec™ corrosion resistant coating is specially formulated to extend the life of Glasdon metal products and components used externally.

Duracore™ material features a tough outer wall of Durapol™ material with an internal reinforcing wall of cellular construction, which increases rigidity and offers outstanding performance benefits. Duracore material will not chip or rust, is easy to clean and never needs painting.

Duraplus™ material is a polymer specially engineered to provide enhanced resilience, which gives improved recovery from impact.

Durapol™ material is a polymer formulated to withstand extremes of temperature and is impact-tested in our Quality Assurance Laboratory as part of our BS EN ISO 9001:2015 test procedure. Durapol material will not chip or rust, is easy to clean and never needs painting.

Duratec™ material has been specifically created for use in internal environments. In addition to its attractive appearance it offers a blend of toughness, rigidity and dimensional stability.

Ecoboard™ material is manufactured using a combination of virgin polymer and post consumer plastic waste to create a very robust and strong panel. Ecoboard™ material will not chip or rust, is easy to clean and never needs painting.

Enviropol™ material is manufactured predominantly from post-consumer plastics. By balancing these uncontaminated recycled waste materials, the result is a remarkably versatile product with many applications and benefits. Enviropol material will not chip or rust, is easy to clean and never needs painting.

Everwood™ material is a realistic timber grain polymer, which requires minimal maintenance. Everwood material is vandal and weather resistant, will not rot, warp or crack.

Vandalex™ material is an aluminium alloy engineered to produce a high modulus of elasticity, which offers increased impact absorption properties. Its anodised finish will not rust, is easy to clean and never needs painting.

All Glasdon products manufactured from Durapol™ material, Duraplus™ material, Duracore™ material, Enviropol™ material, Vandalex™ material and Stainless steel can be recycled at the end of their service life.

Personalisation & Branding

Step 1. Choose from a wide range of products and personalisation options including:

Litter Bins & Recycling Bins - Branding, corporate colour schemes, bespoke waste streams, campaign messaging and changeable poster kits.

Our experienced sales team will advise you on the personalisation options of your chosen product.

We can also send you examples of some of our tried and tested visuals for a little inspiration.

Step 2. Selecting Standard Options

Many of our products offer standard graphics and poster kits to choose from at the point of ordering. Simply select from the drop down menu the option you require on our website or contact our sales office for more information.

Step 3. Looking for Something Different?

If you would like to adapt a standard option by changing graphic colours and waste streams or to include an element of branding, or perhaps you would like to create something completely unique, we can help. Our Sales team will be happy to learn more about your project and requirements. We will work with you to achieve the finish you require.

Step 4. Free Visualisation Service

Our sales team will then liaise with our in-house graphics team to prepare a visual of the product with your chosen personalisation, of which you're able to review and make changes to if required. This is a free service offered to all Glasdon customers.

Step 5. Artwork Approval

We are committed to making sure the end result is exactly right for you. So when you are completely happy with the visual and have agreed any of the additional production costs, we will finalise and deliver your personalised order.

FIREXPIRE

FIRE SAFETY DEVICE

- STAGE 1**
A burning match is carelessly discarded into a litter bin.
- STAGE 2**
The fire takes hold.
- STAGE 3**
In under a minute, the fire extinguishing plate drops onto the liner.
- STAGE 4**
The fire is contained.

An optional extra on Glasdon hooded litter bins, FireXpire™ device is a fire extinguishing plate fitted within the bin top. Should a fire break out inside the bin, a special replaceable, heat responsive device releases the plate which then seals off the mouth of the liner and snuffs out the fire through oxygen starvation. Replacement of the heat responsive device using only a screwdriver resets FireXpire device on site.

(FireXpire is an effective low cost auxiliary device and must never replace primary fire prevention measures. Obstructions preventing the plate from dropping may adversely affect the function of the unit and as many FireXpire devices are used in unsupervised locations, regular inspection and immediate replacement of any damaged or distorted components is essential.)

Glasdon FireSafe™ Device

Is an automatic fire suppression device fitted within the hood of the bin. Should a fire break out inside the bin the device is activated. Glasdon FireSafe is an effective low cost auxiliary device and must never replace primary fire prevention measures. A regular inspection/maintenance programme should be introduced to ensure the device is in working condition or has discharged and therefore needs replacing.

Litter Bin Capacities

The majority of litter bins featured in this catalogue specify two capacities. The 'Bin Volume' is the total capacity the bin liner will hold with the contents measured heaped. The 'Liner Capacity' is the capacity the bin liner will hold with the contents measured flat.

SITING OF NEXUS 360, MODUS & VISAGE

*For the Nexus 360, Modus and Visage, we recommend that a risk assessment is undertaken to identify an appropriate location for your waste collection units. In order to reduce risk, some organisations decide to place the units a minimum of 5 metres away from buildings. Any potential risk can be further reduced by maintaining a regime of regularly emptying the unit. You may also wish to consider installing a Glasdon FireSafe on the Nexus 360 and Modus.
